Summary

Cloud Infrastructure Engineer with 2+ years of production infrastructure operations experience and hands-on AWS, EKS/Kubernetes, Terraform, Linux, CI/CD, and observability projects. Built cloud-native infrastructure projects including an EKS SRE platform with Helm, RDS, ALB Ingress, CloudWatch, HPA, k6 testing, and cost-controlled Terraform workflows.

Technical Skills

Cloud & AWS: VPC, IAM, EC2, S3, Lambda, API Gateway, EventBridge, CloudWatch, SNS, DynamoDB, CloudFront, EKS, ECR, RDS, ALB, Secrets Manager, Bedrock

Infrastructure & DevOps: Terraform, Docker, Kubernetes, Helm, GitHub Actions, CI/CD, Linux (Ubuntu), Ingress, ConfigMaps, Secrets, Probes, HPA

Observability & SRE: CloudWatch Logs/Metrics/Alarms, Incident Response, RCA, Runbooks, SLA Troubleshooting, MTTR, SLO Metrics, Production Operations

Networking: TCP/IP, BGP, OSPF, MPLS, VPN, DNS, Load Balancing, Firewalls, Network Security, Juniper/Cisco Routing

Programming & Databases: Python, Bash, SQL, PostgreSQL, REST APIs, FastAPI, React

Certifications: AWS Certified Cloud Practitioner (2026)

Experience

Tata Communications

June 2022 – July 2024

Senior Engineer, Shift Lead (production NOC operations)

Pune, India

- Owned high-severity incidents across 25-30 Tier-1 carrier clients on global ILL, DWDM, and submarine cable networks, driving triage, TAC/vendor coordination, field dispatch, and restoration.
- Isolated BGP/MPLS failures, TCP/IP issues, DWDM faults, and equipment malfunctions across Juniper, Huawei, Ciena, and Alcatel platforms using alarms, logs, loop testing, submarine handoffs, and segment-wise isolation.
- Led 5-person global NOC shifts through 40+ daily priority incidents, including AVP/VP-level escalations, coordinating handoffs, RCA notes, customer-premises testing, and cross-functional follow-up until resolution.
- Restored high-priority services within 4-hour SLA targets and contributed to 99.9% annual network availability through TAC, field, and vendor escalations; earned Certificate of Excellence.

Projects

CloudOps SRE Platform | EKS, Terraform, Helm, Docker, RDS

June 2026

- Built an EKS-based SRE operations platform centralizing service health, deployment history, incident timelines, MTTR metrics, SLO tracking, and error budget views for cloud operations workflows.
- Deployed FastAPI and React workloads behind ALB Ingress on EKS with Helm-managed Kubernetes deployments, services, resource limits, liveness/readiness probes, and Secrets Manager-backed database credentials.
- Validated autoscaling under k6 load as backend replicas scaled from 2 to 6 pods, handling 2,811 requests with 0 failed requests and 1.21s p95 latency; confirmed behavior through HPA status and CloudWatch logs.

CloudOps Uptime Monitor | Lambda, DynamoDB, API Gateway, Terraform

May 2026

- Built serverless uptime monitoring platform on AWS using EventBridge, Lambda, DynamoDB, API Gateway, SNS, CloudWatch, Terraform, and React on S3/CloudFront.
- Optimized current-status reads from 86,400 history records to 10 latest-status rows for a 10-URL, 30-day workload; added API keys, throttling, restricted CORS, KMS, DLQs, state-change alerts, 9 CloudWatch metrics, and CI quality gates.

AWS Incident Triage Pipeline | Lambda, CloudWatch, SNS, Bedrock, Terraform

May 2026

- Engineered event-driven incident triage pipeline where CloudWatch alarms trigger Lambda to parse alert context and publish Bedrock-assisted summaries through SNS.
- Used Amazon Bedrock to generate remediation-focused summaries with likely causes, severity, and immediate actions; provisioned Lambda, SNS, IAM, and CloudWatch alarms using Terraform.

Education

Indiana University Bloomington

August 2024 – May 2026

Master of Science in Computer Science, GPA: 3.5/4.0

Bloomington, IN

SRM Institute of Science and Technology

June 2018 – June 2022

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.4/10

Chennai, India
